Figure 1 is a plot showing the ratio of the cross section to the total cross section, $\sigma^0_0 / \sigma_{\text{tot}}$, as a function of the invariant mass of the photon pair, $\sqrt{s_{00}}$. The x-axis ranges from 54.54 to 54.62 GeV. The y-axis ranges from 0.0 to 1.0. Data points are shown as black circles with vertical error bars. A solid red horizontal line is drawn at $y = 0.0$. A dashed red horizontal line is drawn at $y = 0.5$. A solid black horizontal line is drawn at $y = 1.0$. The plot shows a clear dip in the ratio around 54.58 GeV, reaching a minimum of approximately 0.1. The ratio is generally higher at the edges of the plotted range, reaching about 0.6 at 54.54 GeV and 0.7 at 54.62 GeV. The error bars are largest for the points at the edges of the range.
