The figure is a scatter plot titled "asym_sam1". The x-axis is labeled "asym" and the y-axis is labeled "sam1". Both axes range from -0.003 to 0.003 with major tick marks every 0.001. The data points are plotted as small squares, forming a strong positive linear correlation along the diagonal line where y=x. The color of the points varies, with a color bar on the right side of the plot indicating a scale from 0 to 80. The color gradient transitions from dark blue at the bottom (low values) to yellow at the top (high values), with intermediate colors like cyan, green, and orange. The points are most densely packed along the diagonal line.

A heatmap titled "asym_sam1" showing the asymptotic covariance matrix. The x-axis and y-axis are both labeled "asym_sam1" and range from -0.003 to 0.003. The color scale on the right ranges from 0 (dark blue) to 35 (yellow). The matrix is symmetric and shows a strong positive correlation along the diagonal, with values decreasing as the distance from the diagonal increases.
