The figure consists of five scatter plots arranged horizontally, each showing the distribution of differences between two systems. The y-axis for all plots ranges from -10000 to 10000. The x-axis for each plot represents the difference in micrometers (um).

- diff_bpm1X**: The x-axis ranges from -40 to 40. The distribution is centered around 0.
- diff_bpm4aY**: The x-axis ranges from -30 to 30. The distribution is centered around 0.
- diff_bpm4eX**: The x-axis ranges from -40 to 50. The distribution is centered around 0.
- diff_bpm4eY**: The x-axis ranges from -30 to 30. The distribution is centered around 0.
- diff_bpm12X**: The x-axis ranges from -200 to 100. The distribution is centered around 0.
