The figure is a scatter plot titled "asym_usl". The x-axis is labeled "asym_usl" and ranges from -0.01 to 0.015. The y-axis is labeled "asym_usl" and ranges from -0.01 to 0.015. The plot shows a strong positive linear correlation, with data points forming a diagonal line from the bottom-left to the top-right. A color bar on the right side of the plot indicates a scale from 0 to 800, with colors transitioning from dark blue at the bottom to yellow at the top. The data points are concentrated along the diagonal, suggesting a high degree of agreement between the two variables.
