diff_bpm4eY

diff_bpm12X

The figure displays five scatter plots, each representing the difference between regression and nonparametric methods for a specific variable. The plots are arranged horizontally. Each plot has a y-axis labeled 'diff_bpm' and an x-axis labeled 'diff_bpm'. The y-axis ranges from -10000 to 10000, and the x-axis ranges from -40 to 60. The data points are densely clustered around the origin (0,0), indicating a high degree of agreement between the two methods. The plots are titled as follows:

- diff_bpm1X
- diff_bpm4aY
- diff_bpm4eX
- diff_bpm4eY
- diff_bpm12X
