The figure is a scatter plot titled "asym_usl". The x-axis is labeled "asym" and the y-axis is labeled "usl". Both axes range from -0.006 to 0.006 with major ticks every 0.002. A diagonal line of data points is plotted, showing a strong positive linear correlation. The points are colored based on a scale from 0 to 40, with a color bar on the right side of the plot. The color scale ranges from dark blue (0) to yellow (40), with intermediate colors representing values in between. The data points are concentrated along the diagonal line, with a few outliers visible.
