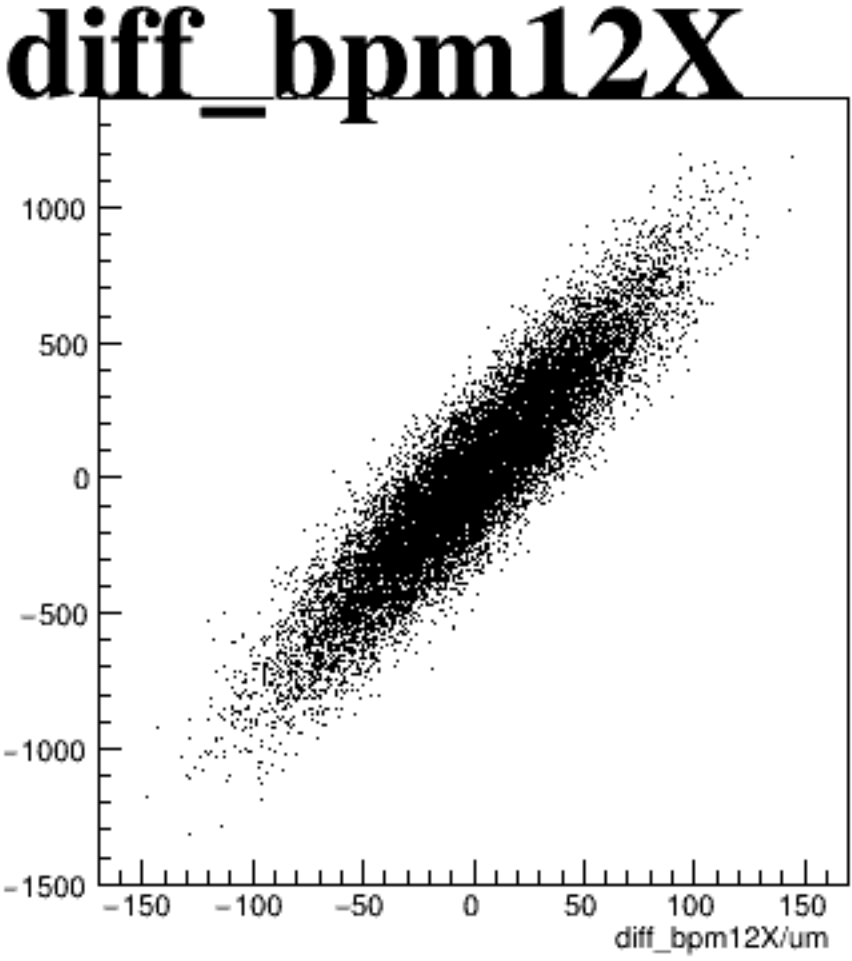

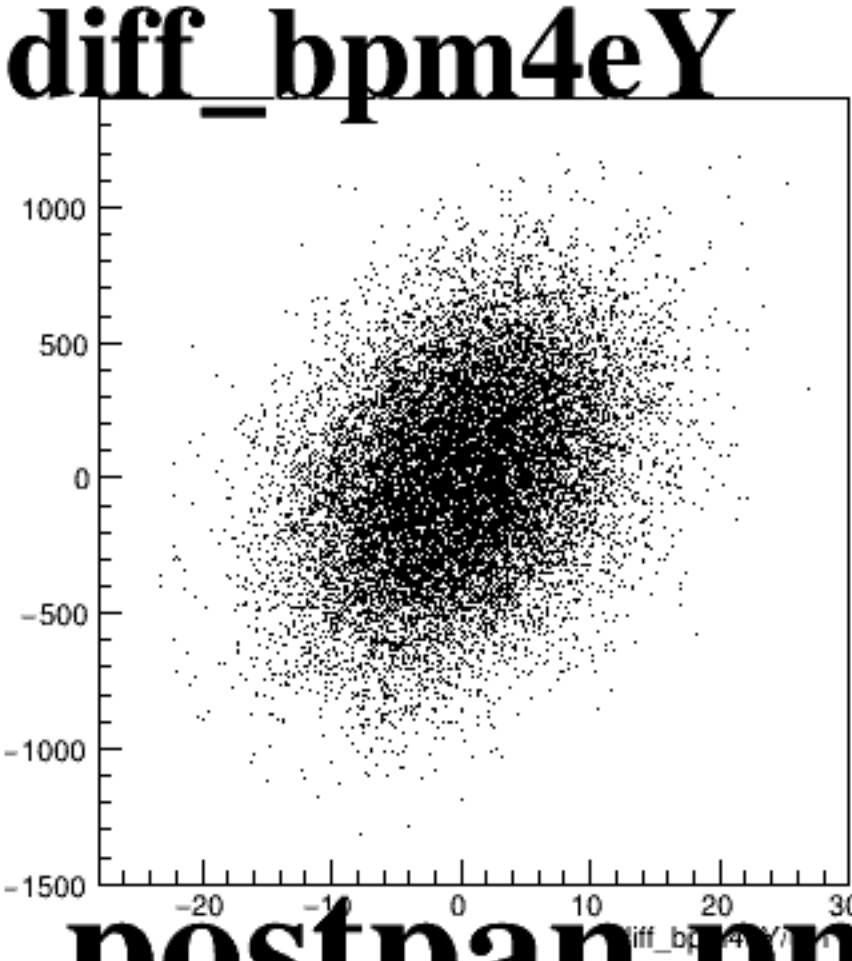

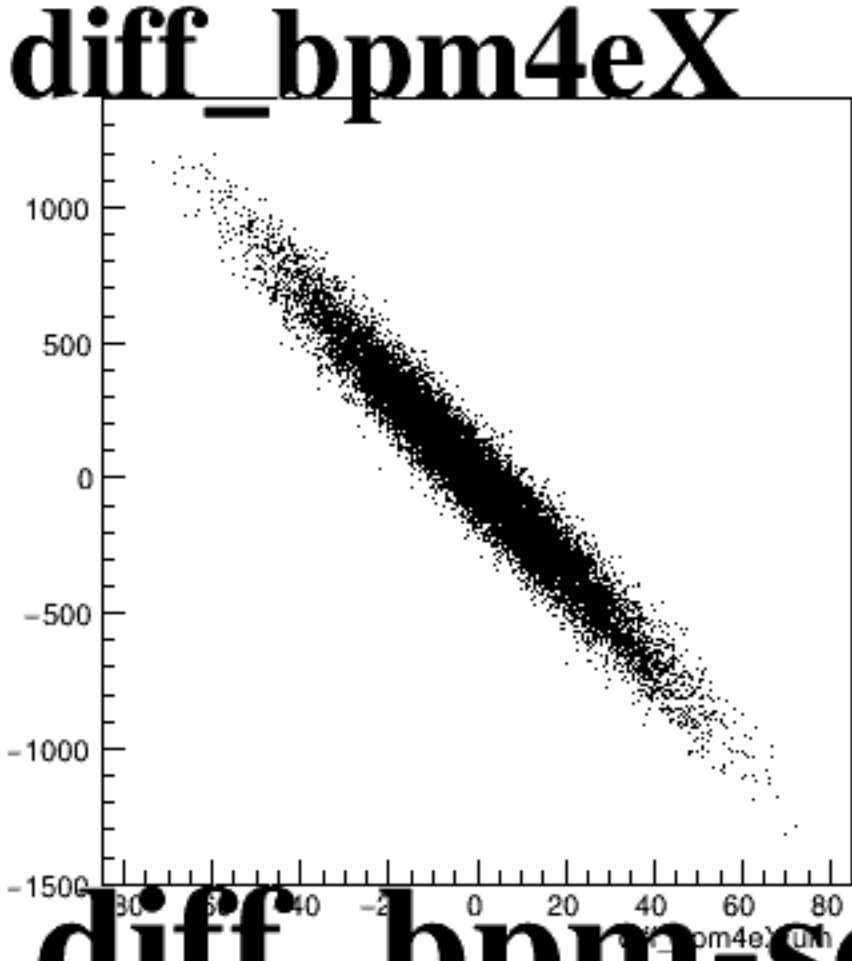

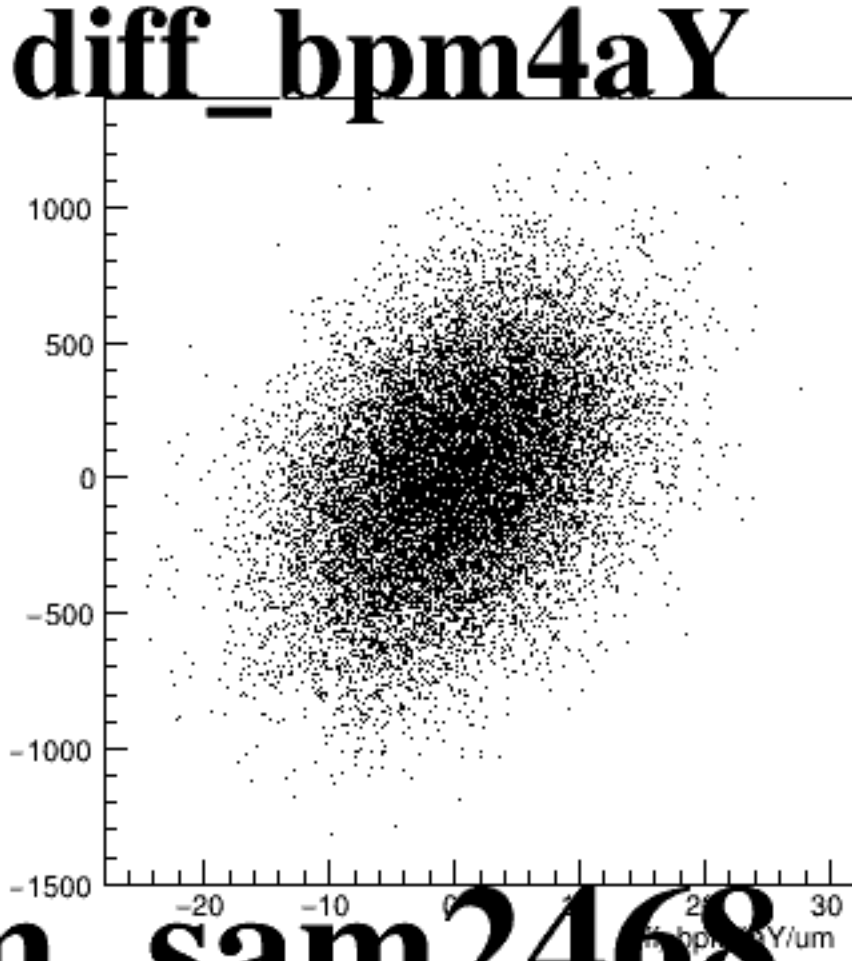

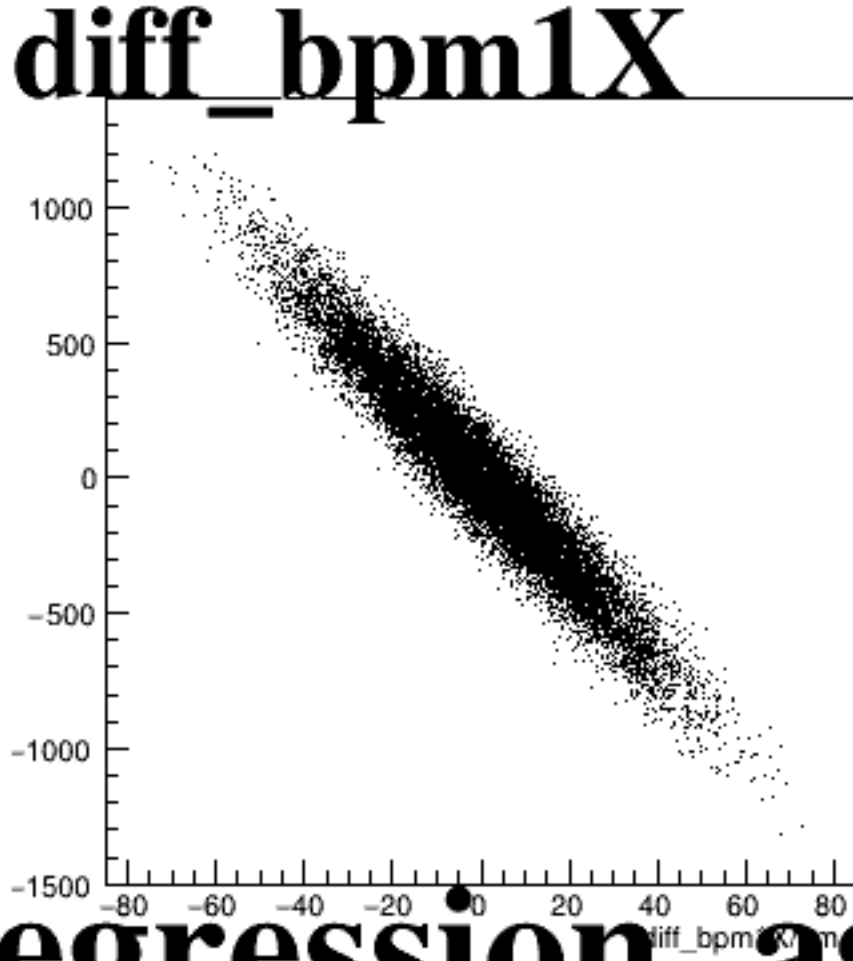

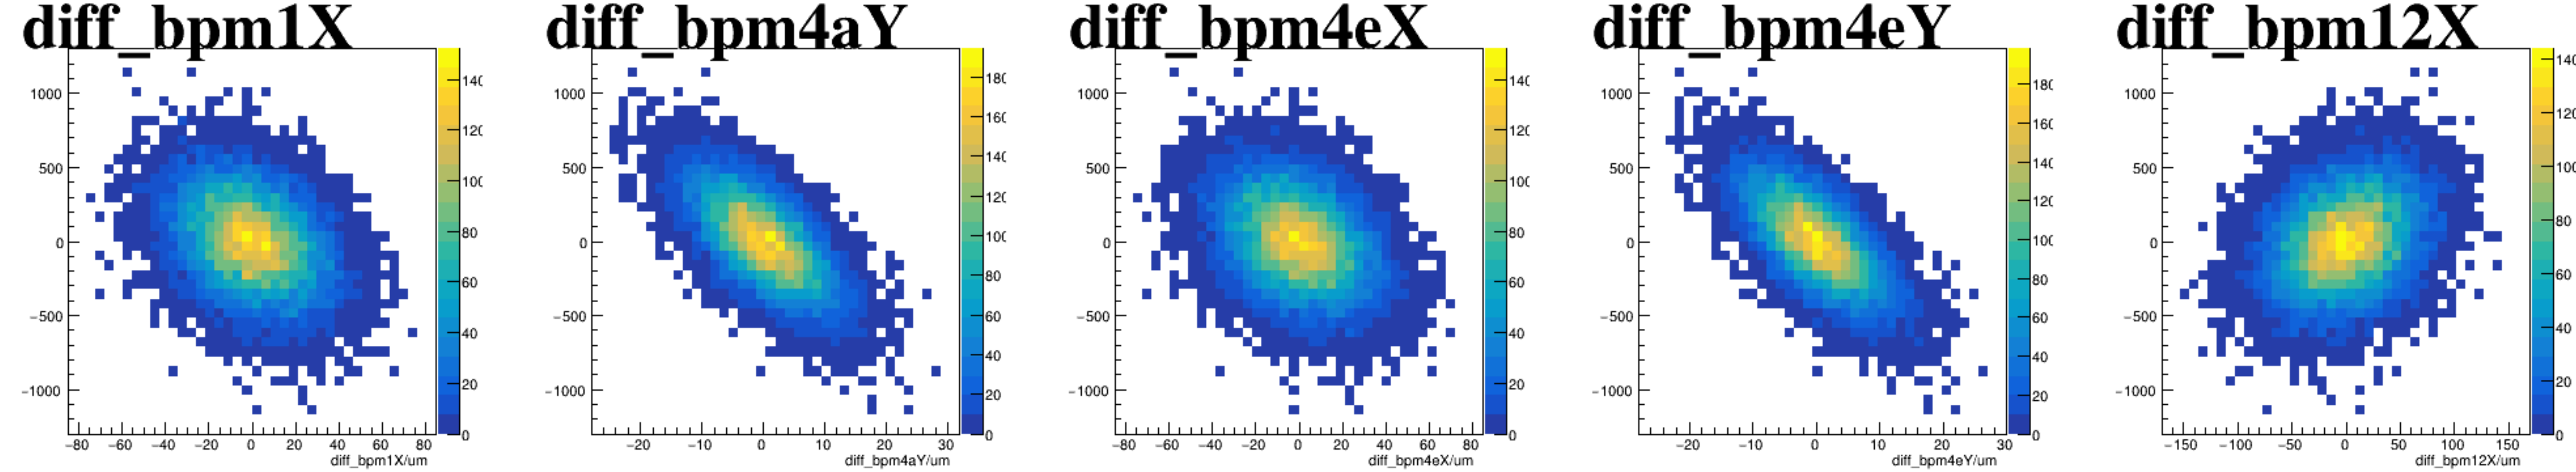

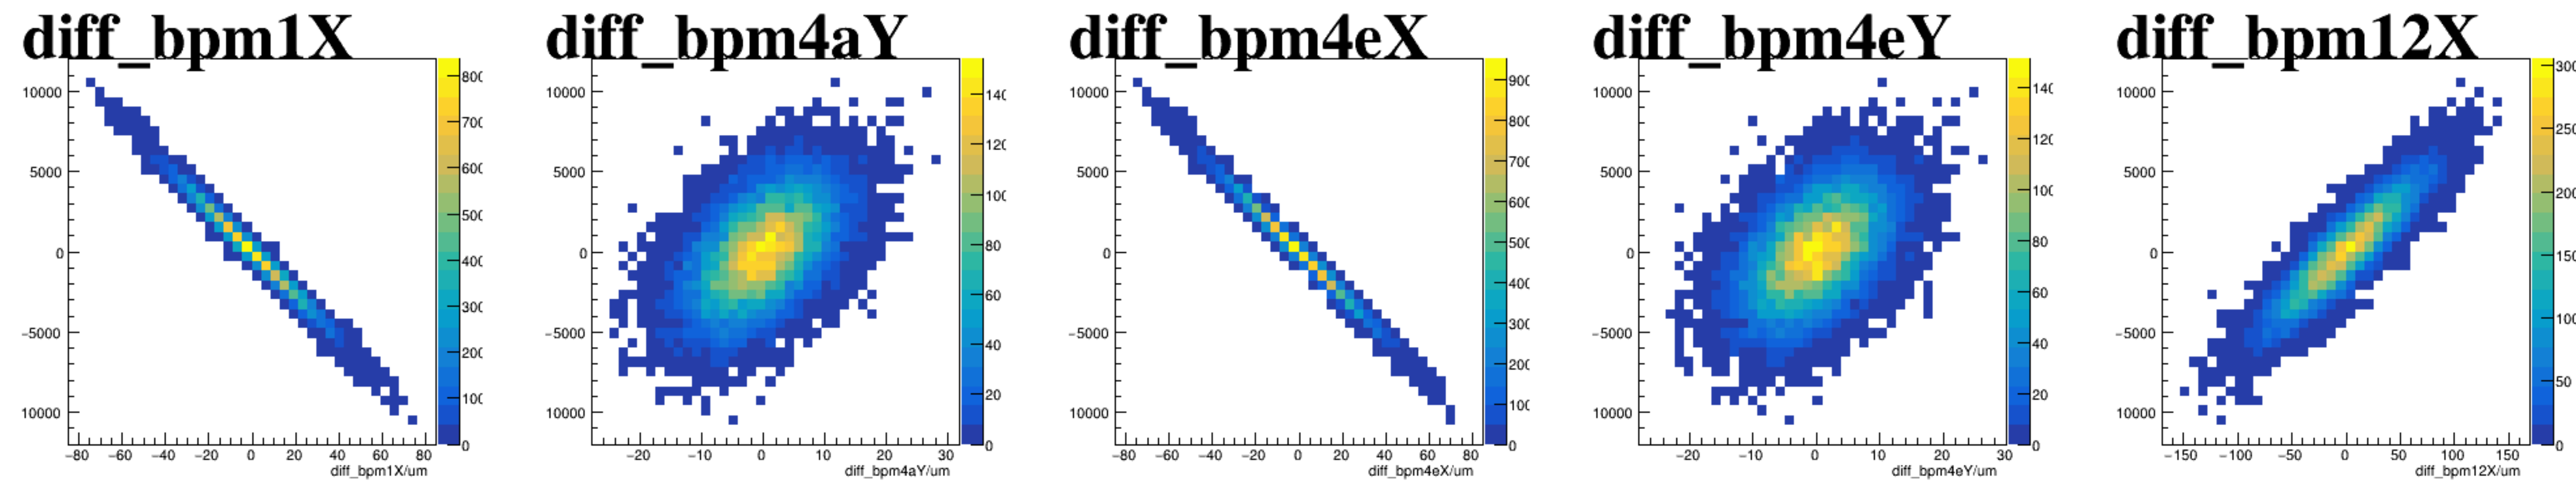

Figure 1 consists of five scatter plots arranged in a single row. Each plot shows the difference between BPM12 and another BPM (BPM1, BPM4a, BPM4e) in X and Y coordinates. The plots are labeled as follows: **diff_bpm1X**, **diff_bpm4aY**, **diff_bpm4eX**, **diff_bpm4eY**, and **diff_bpm12X**. The x-axis for all plots is labeled 'diff_bpm12X/um' and ranges from -80 to 80. The y-axis for all plots is labeled 'diff_bpm12Y/um' and ranges from -300 to 300. The plots show a dense cloud of points centered around the origin, indicating good agreement between the different BPMs.
