A scatter plot showing the relationship between `asy8` (y-axis) and `asym_sam8` (x-axis). The data points are colored according to a scale from 0 to 40, with a color bar on the right. The plot shows a strong positive linear correlation, with points clustered along the diagonal line $y = x$. The axes range from -0.002 to 0.002.

asym_sam6

asym_sam8

The figure is a scatter plot with the title "asym_sam2". The x-axis is labeled "asym_sam2" and the y-axis is also labeled "asym_sam2". Both axes range from -0.02 to 0.02 with major tick marks every 0.01. The plot shows a series of small blue dots representing data points, which are tightly clustered around a solid black line representing the linear regression. The line passes through the origin (0,0) and has a positive slope, indicating a strong positive linear correlation between the two variables.

The scatter plot, titled "asym_sam8", displays a dense cloud of points indicating a strong positive linear relationship. Both the x-axis and y-axis are labeled "asym_sam8" and range from -0.02 to 0.02 with major tick marks every 0.005 units. The data points are most concentrated along the diagonal line where the two variables are equal, with a slight tapering off as the values move towards the extremes of the range.

A scatter plot showing the relationship between two variables, both labeled 'asym_sam4'. The plot displays a dense, elongated cloud of points, indicating a strong positive correlation. The axes range from -0.02 to 0.02, with major ticks every 0.002 units. The points are most concentrated along the diagonal line where the two variables are equal.

A scatter plot showing the relationship between two variables, both labeled 'asym_sam8'. The plot displays a dense cloud of points forming a diagonal band from the top-left to the bottom-right, indicating a strong negative correlation. The axes range from approximately -0.002 to 0.002 on the x-axis and -0.008 to 0.01 on the y-axis.
