The figure consists of five scatter plots arranged horizontally, each showing the distribution of differences between two beam position monitors (BPMs). The y-axis for all plots is labeled 'diff_bpmX' and ranges from -10000 to 10000. The x-axis for all plots is labeled 'diff_bpmX/um'.

- diff_bpm1X:** The x-axis ranges from -40 to 80. The distribution is centered around (0,0).
- diff_bpm4aY:** The x-axis ranges from -30 to 30. The distribution is centered around (0,0).
- diff_bpm4eX:** The x-axis ranges from -40 to 60. The distribution is centered around (0,0).
- diff_bpm4eY:** The x-axis ranges from -30 to 30. The distribution is centered around (0,0).
- diff_bpm12X:** The x-axis ranges from -150 to 150. The distribution is centered around (0,0).
