The figure consists of five scatter plots arranged horizontally, each showing the distribution of differences between two measurements. The y-axis for all plots ranges from -10000 to 10000. The x-axis for each plot represents the difference in micrometers (um).

- diff_bpm1X**: The x-axis ranges from -50 to 150. The distribution is centered around 0.
- diff_bpm4aY**: The x-axis ranges from -30 to 30. The distribution is centered around 0.
- diff_bpm4eX**: The x-axis ranges from -60 to 120. The distribution is centered around 0.
- diff_bpm4eY**: The x-axis ranges from -30 to 30. The distribution is centered around 0.
- diff_bpm12X**: The x-axis ranges from -150 to 150. The distribution is centered around 0.
