A scatter plot showing the relationship between `asym_dsr` on the x-axis and `asym_dsr` on the y-axis. The data points form a strong positive linear correlation, appearing as a diagonal line of points. A color bar on the right indicates a scale from 0 to 14, with colors ranging from dark blue (low values) to yellow (high values). The points are colored according to this scale, showing a gradient along the diagonal.
