The figure is a scatter plot titled "asym_dsr". The x-axis is labeled "asym_dsr" and ranges from -0.003 to 0.003. The y-axis is unlabeled but also ranges from -0.003 to 0.003. The data points form a strong positive linear correlation, appearing as a diagonal line of points. The points are colored based on a scale from 0 to 800, with a color bar on the right side of the plot. The color scale ranges from dark blue (0) to yellow (800). The points are most densely packed near the origin (0,0) and become sparser as they move towards the corners of the plot.
