The figure consists of five scatter plots arranged horizontally, each showing the difference between BPM4 and BPM5 for a specific parameter. The y-axis for all plots ranges from -1500 to 1500. The x-axis labels are partially visible at the bottom of the plots.

- diff_bpm4aX**: The x-axis is labeled "diff_bpm4aX/um". The data points are centered around zero, with a spread of approximately ±8.
- diff_bpm4aY**: The x-axis is labeled "diff_bpm4aY/um". The data points are centered around zero, with a spread of approximately ±30.
- diff_bpm4eX**: The x-axis is labeled "diff_bpm4eX/um". The data points are centered around zero, with a spread of approximately ±60.
- diff_bpm4eY**: The x-axis is labeled "diff_bpm4eY/um". The data points are centered around zero, with a spread of approximately ±20.
- diff_bpmE**: The x-axis is labeled "diff_bpmE/um". The data points are centered around zero, with a spread of approximately ±30.
