The figure consists of five scatter plots arranged horizontally, each showing the distribution of differences between two systems. The y-axis for all plots ranges from -600 to 600. The x-axis for each plot represents the difference between the two systems, with labels at the bottom: 'diff_bpm4aX/um', 'diff_bpm4aY/um', 'diff_bpm4eX/um', 'diff_bpm4eY/um', and 'diff_bpmE/um'. The plots are titled 'diff_bpm4aX', 'diff_bpm4aY', 'diff_bpm4eX', 'diff_bpm4eY', and 'diff_bpmE' respectively. Each plot shows a dense cloud of points centered around zero, indicating good agreement between the two systems.
