The figure consists of five scatter plots arranged horizontally, each showing the difference in BPM (diff_bpm) for a specific parameter. The y-axis for all plots is labeled 'diff_bpm' and ranges from -1500 to 1500. The x-axis for each plot is labeled with the parameter name and 'diff_bpm'.

- diff_bpm4aX**: The x-axis is labeled 'diff_bpm4aX'. The data points are centered around zero, with a spread of approximately ±10.
- diff_bpm4aY**: The x-axis is labeled 'diff_bpm4aY'. The data points are centered around zero, with a spread of approximately ±10.
- diff_bpm4eX**: The x-axis is labeled 'diff_bpm4eX'. The data points are centered around zero, with a spread of approximately ±10.
- diff_bpm4eY**: The x-axis is labeled 'diff_bpm4eY'. The data points are centered around zero, with a spread of approximately ±10.
- diff_bpmE**: The x-axis is labeled 'diff_bpmE'. The data points are centered around zero, with a spread of approximately ±10.

All plots show a dense cloud of points, indicating high agreement between the two methods for all parameters.
