The figure displays five scatter plots, each representing the distribution of a different difference variable. The plots are arranged horizontally. Each plot has a y-axis ranging from -2500 to 2000 and an x-axis ranging from -6 to 6 (for BPM4aX), -40 to 40 (for BPM4aY), -40 to 50 (for BPM4eX), -20 to 20 (for BPM4eY), and -20 to 20 (for BPM4E). The data points are densely packed in the center, forming a circular shape, which suggests a Gaussian distribution of the differences.
