The figure consists of five scatter plots arranged horizontally, each showing the difference between BPM4 and ESO regression results for a specific parameter. The plots are titled: **diff_bpm4aX**, **diff_bpm4aY**, **diff_bpm4eX**, **diff_bpm4eY**, and **diff_bpmE**. Each plot has a y-axis ranging from -1500 to 1500 and an x-axis ranging from -30 to 30. The data points are densely clustered around the origin (0,0), indicating a high level of agreement between the two methods for all parameters.
