The figure is a scatter plot titled "asym_sam8". The x-axis and y-axis both range from -0.008 to 0.008, with major tick marks every 0.002. The data points form a strong positive linear trend. A color bar on the right side of the plot indicates a third variable, with a scale from 0 (dark blue) to 400 (yellow). The points are colored based on this scale, showing that the highest values (yellow) are clustered around the origin (0,0), while the lowest values (dark blue) are found at the extreme ends of the linear distribution.

The figure is a 2D histogram plot titled "asym_sam7". The x-axis is labeled "asym_sam7" and ranges from -0.008 to 0.008. The y-axis ranges from -0.01 to 0.01. The plot shows a central peak with a color scale on the right ranging from 0 to 800. The distribution is roughly circular but shows some elongation along the x-axis.
