Figure 1 consists of five scatter plots arranged horizontally, each showing the difference in BPM (BPM difference) between the 4a and 4e channels for X and Y coordinates. The plots are titled 'diff_bpm4aX', 'diff_bpm4aY', 'diff_bpm4eX', 'diff_bpm4eY', and 'diff_bpmE'. Each plot shows a dense cloud of points centered around zero, indicating good agreement between the channels. The x-axis for all plots is 'diff_bpm4aX/um' or 'diff_bpm4eX/um' or 'diff_bpmE/um', and the y-axis is 'diff_bpm4aY/um' or 'diff_bpm4eY/um' or 'diff_bpmE/um'. The axes range from -6 to 6 for 'diff_bpm4aX', -10 to 10 for 'diff_bpm4aY', -40 to 50 for 'diff_bpm4eX', -40 to 30 for 'diff_bpm4eY', and -30 to 30 for 'diff_bpmE'. The y-axis ranges from -1000 to 1000 for all plots.
