The figure consists of five scatter plots arranged horizontally, each showing the difference between BPM4 and ESO regression results for a specific parameter. The y-axis for all plots is labeled 'diff_bpm4' and ranges from -2000 to 2500. The x-axis for all plots is labeled 'diff_bpmE/um' and ranges from -40 to 40. The plots are titled: diff_bpm4aX, diff_bpm4aY, diff_bpm4eX, diff_bpm4eY, and diff_bpmE. Each plot shows a dense cloud of points centered around zero, indicating good agreement between the two methods.
