The figure is a scatter plot with the title "asym\_sam2" in a large, bold, black serif font at the top left. The x-axis is labeled "asym sam1" and the y-axis is labeled "asym sam2", both in a black serif font. The x-axis ranges from -0.02 to 0.02 with major tick marks every 0.005 units. The y-axis ranges from -0.02 to 0.02 with major tick marks every 0.005 units. The plot contains numerous data points, each represented by a small open circle. A solid black line of best fit is drawn through the data, showing a strong positive linear correlation. The data points are distributed fairly evenly around the line across the entire range.

The scatter plot, titled "asym\_sam4", displays a dense cloud of points indicating a strong positive linear relationship. Both the x-axis and y-axis are labeled "asym sam4" and range from -0.02 to 0.02 with major tick marks every 0.005 units. The data points are most concentrated along the diagonal line where y = x, showing a very high degree of agreement between the two measurements.

# asym\_sam6

The scatter plot displays a dense cloud of points forming a diagonal band from the upper-left to the lower-right. The axes are labeled with numerical values, and the overall distribution indicates a strong negative linear relationship.
