The figure displays five scatter plots arranged horizontally, each showing the distribution of a different variable. All plots share a common y-axis ranging from -8000 to 8000 with major ticks every 2000 units. The x-axes are labeled with the variable names and units (um).

- diff_bpm4aX**: The x-axis ranges from -8 to 8. The distribution is a dense, roughly circular cloud of points centered at (0,0).
- diff_bpm4aY**: The x-axis ranges from -10 to 15. The distribution is a dense, roughly circular cloud of points centered at (0,0).
- diff_bpm4eX**: The x-axis ranges from -60 to 40. The distribution is a dense, roughly circular cloud of points centered at (0,0).
- diff_bpm4eY**: The x-axis ranges from -30 to 20. The distribution is a dense, vertically elongated elliptical cloud of points centered at (0,0).
- diff_bpmE**: The x-axis ranges from -40 to 40. The distribution is a dense, roughly circular cloud of points centered at (0,0).
