asym_sam8

The figure is a 2D density plot titled "asym_sam8". The x-axis is labeled "asym_sam8" and ranges from -0.008 to 0.012. The y-axis ranges from -0.01 to 0.025. The plot shows a dense, elongated cluster of points along the diagonal, with a color scale on the right indicating density from 0 (dark blue) to 10 (yellow). A single outlier point is visible at approximately (0.011, 0.023).

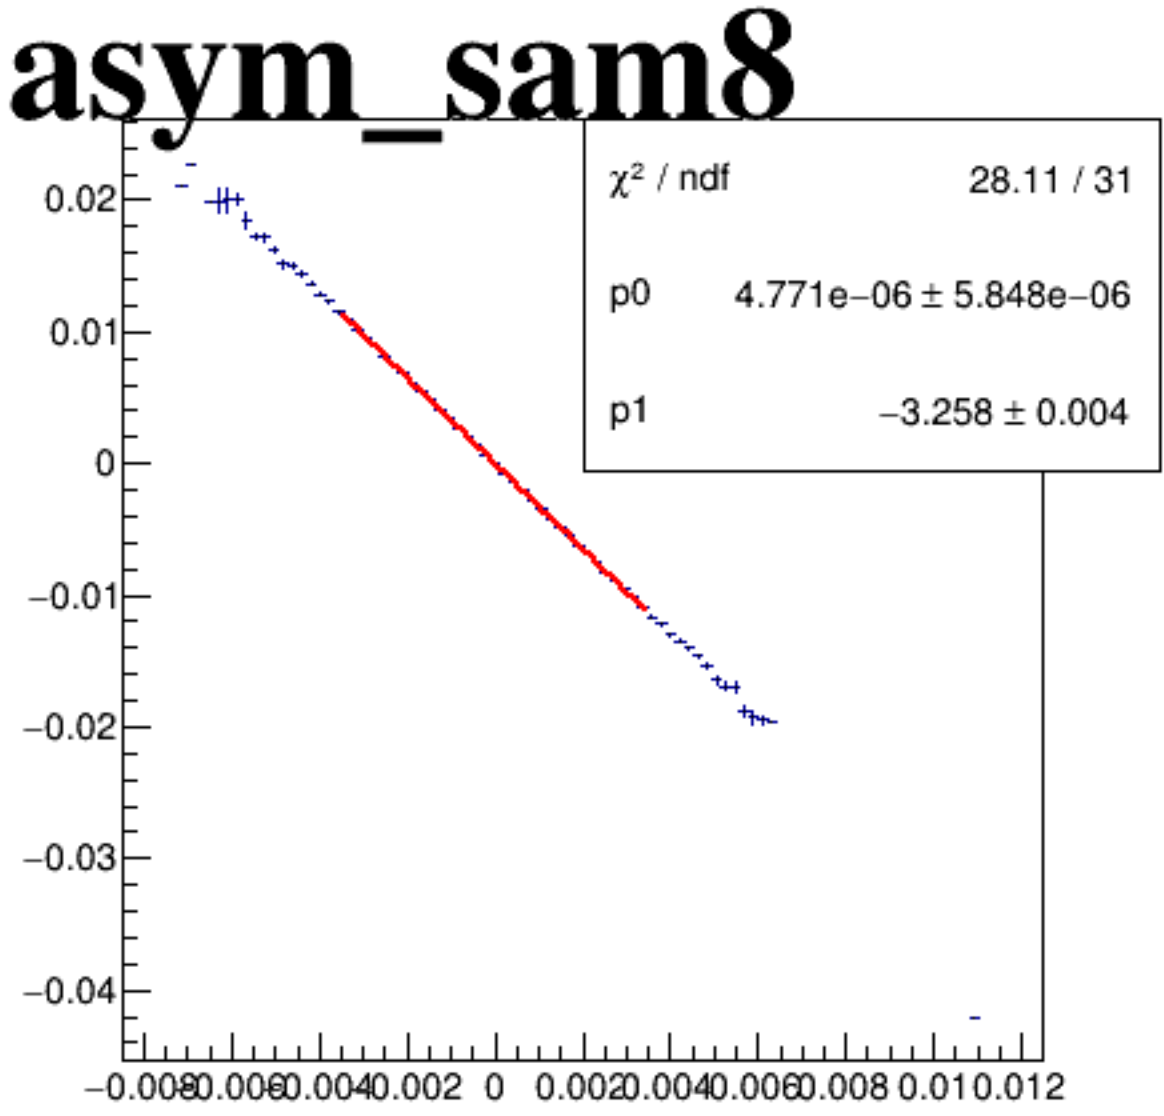

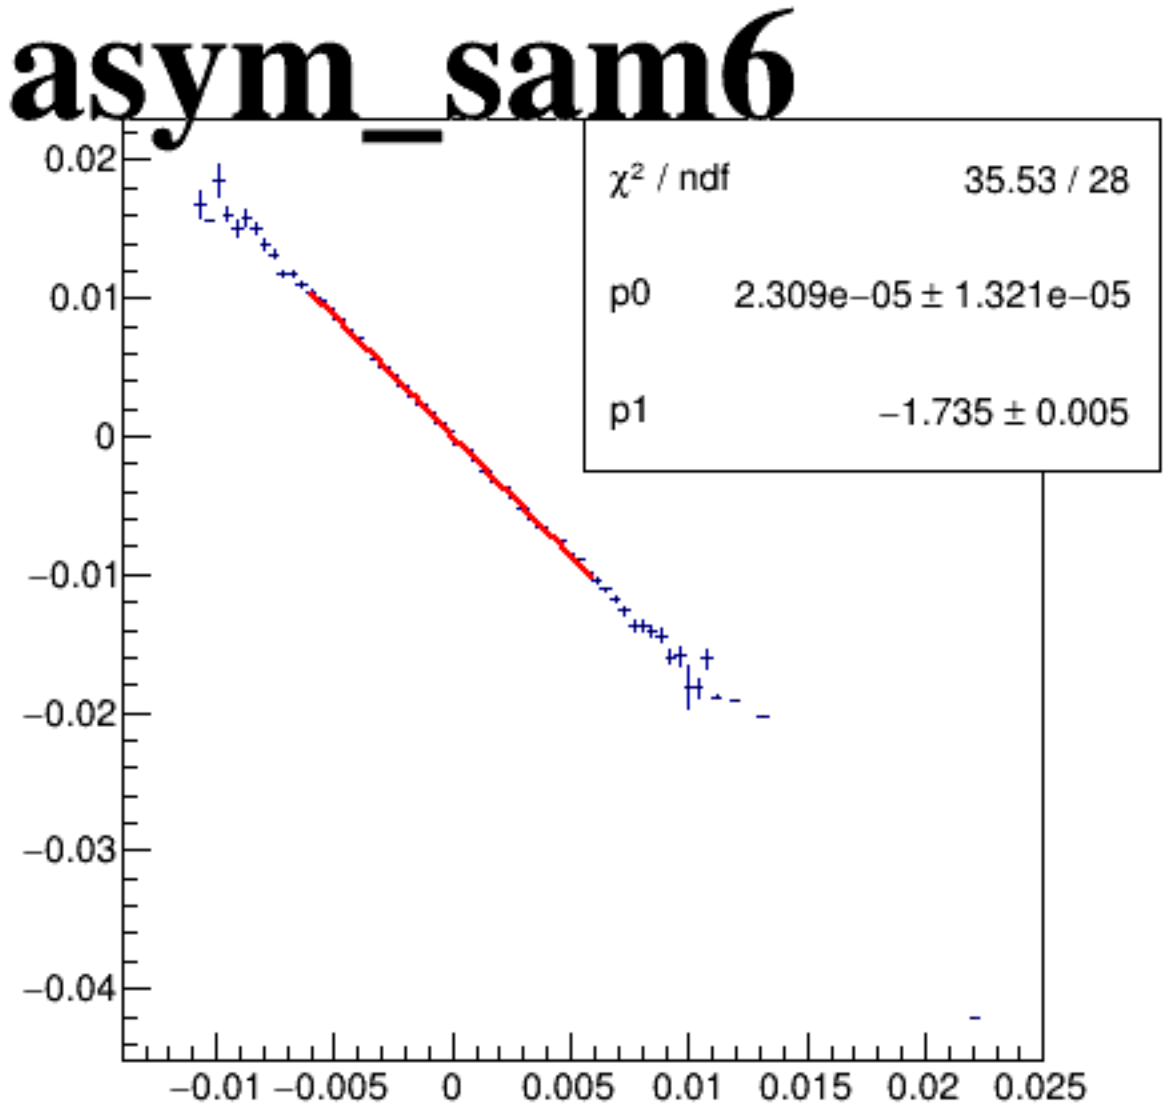

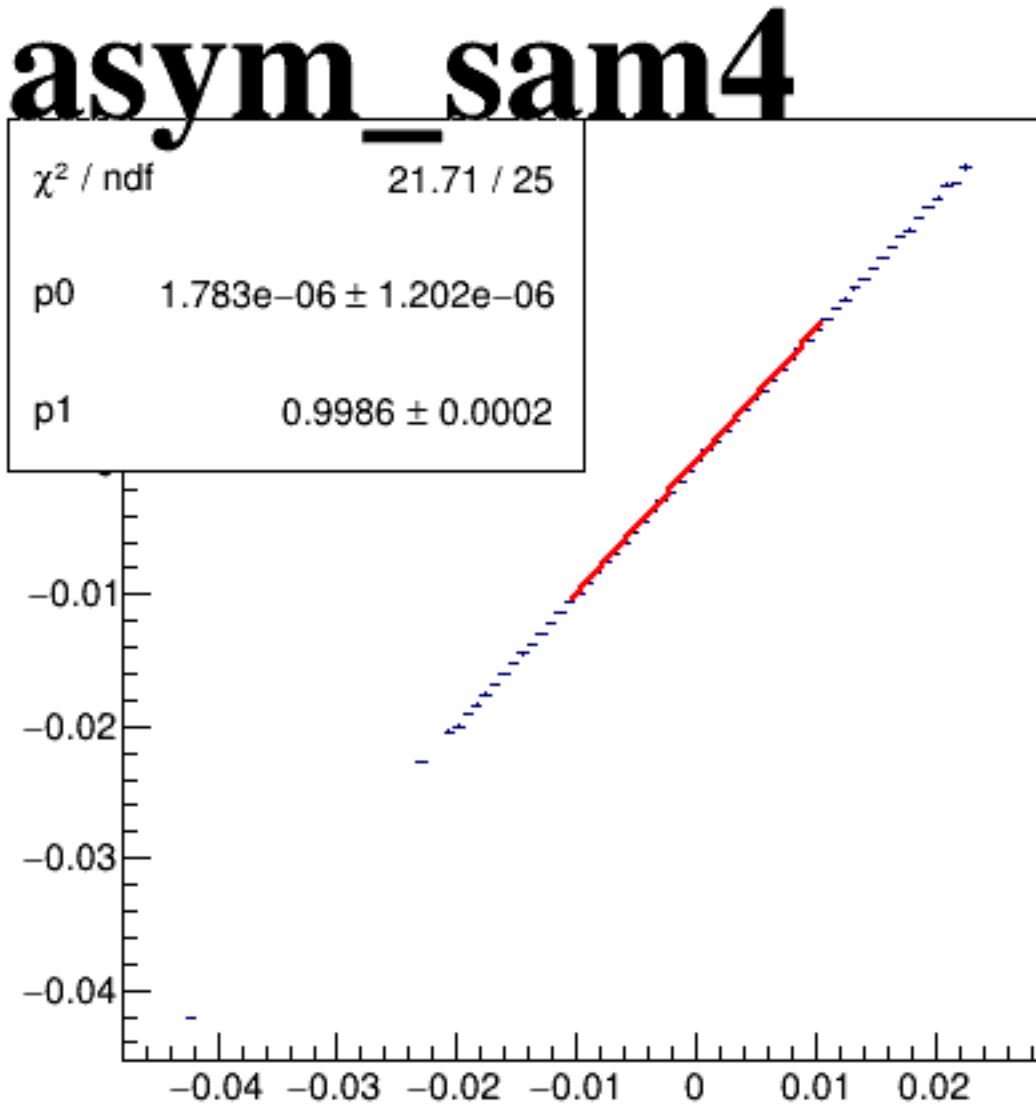

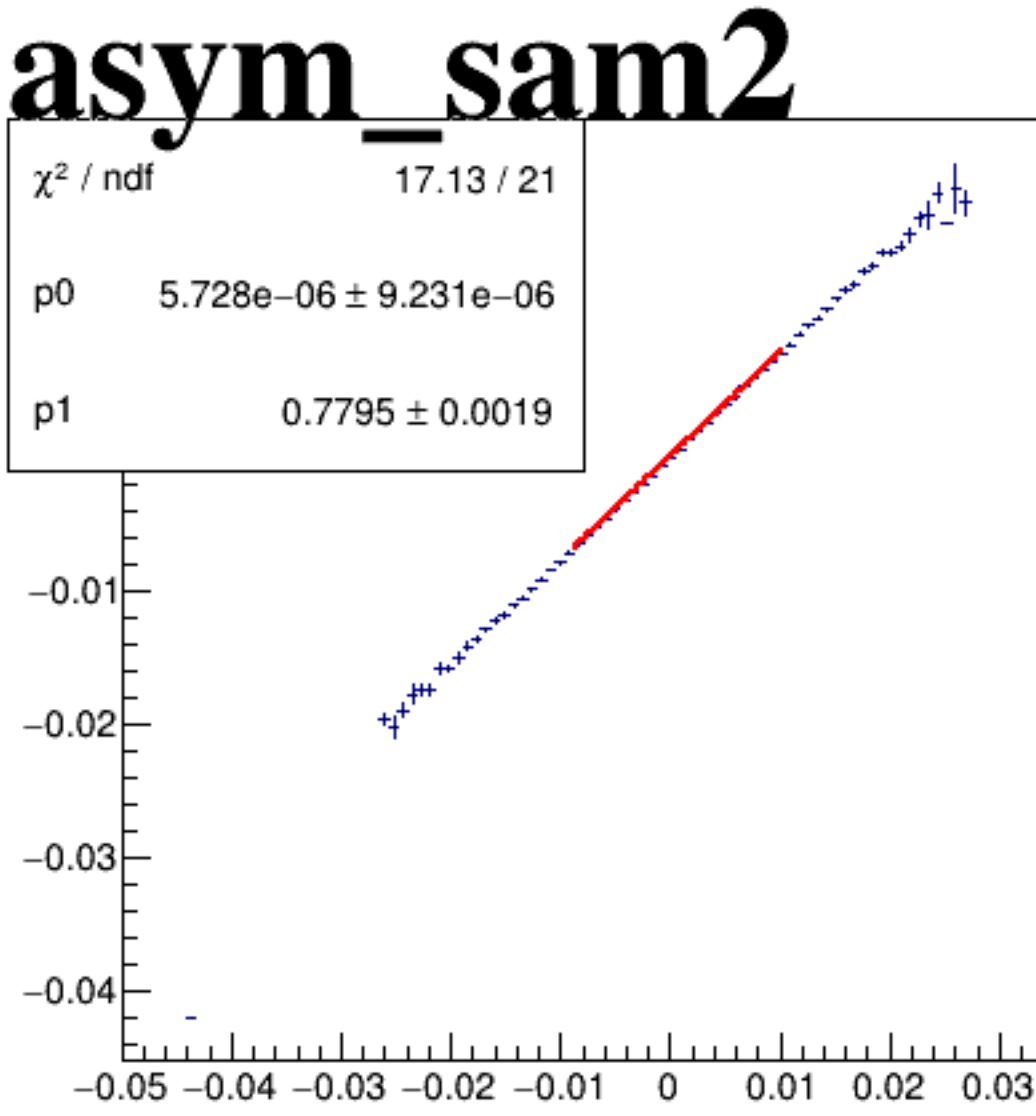

asym_sam8

The scatter plot, titled "asym_sam8", displays the relationship between two variables, "asym" (x-axis) and "sam8" (y-axis). Both axes range from -0.008 to 0.012. The data points form a strong positive linear correlation, following a diagonal line from the bottom-left to the top-right. A single outlier is present at approximately (0.011, 0.011). A color bar on the right side of the plot indicates the magnitude of the data, ranging from -6 (dark blue) to 4 (yellow).
