Figure 1 consists of five scatter plots arranged horizontally, each showing the distribution of differences between BPM4 and BPM5 for a specific parameter. The plots are titled: **diff_bpm4aX**, **diff_bpm4aY**, **diff_bpm4eX**, **diff_bpm4eY**, and **diff_bpmE**. Each plot has a y-axis ranging from -600 to 600 and an x-axis ranging from -8 to 8. The data points are densely clustered around the origin (0,0), indicating a high degree of agreement between the two models for these parameters.
