The figure displays five scatter plots comparing the difference between BPM4 and BPM5 for various variables. The plots are arranged in a single row, each with a title above it. The y-axis for all plots ranges from -600 to 600. The x-axis for each plot represents the difference between the two models for a specific variable.

- diff_bpm4aX**: The x-axis ranges from -20 to 20. The data points are tightly clustered around zero.
- diff_bpm4aY**: The x-axis ranges from -15 to 15. The data points are tightly clustered around zero.
- diff_bpm4eX**: The x-axis ranges from -80 to 100. The data points are tightly clustered around zero.
- diff_bpm4eY**: The x-axis ranges from -10 to 10. The data points are tightly clustered around zero.
- diff_bpmE**: The x-axis ranges from -40 to 50. The data points are tightly clustered around zero.
