The figure displays five scatter plots, each representing the distribution of difference coordinates for a specific BPM. The plots are arranged horizontally and labeled as follows:

- diff_bpm4aX**: The x-axis ranges from -10 to 15, and the y-axis ranges from -1000 to 1300.
- diff_bpm4aY**: The x-axis ranges from -40 to 60, and the y-axis ranges from -1000 to 1300.
- diff_bpm4eX**: The x-axis ranges from -60 to 60, and the y-axis ranges from -1000 to 1300.
- diff_bpm4eY**: The x-axis ranges from -40 to 40, and the y-axis ranges from -1000 to 1300.
- diff_bpmE**: The x-axis ranges from -40 to 60, and the y-axis ranges from -1000 to 1300.

Each plot shows a dense, roughly circular cloud of points centered around the origin, indicating a Gaussian-like distribution of the difference coordinates. The axes are labeled with the difference coordinate and a unit 'um'.
