The figure consists of five scatter plots arranged horizontally, each showing the difference between two models for a specific component. The y-axis for all plots is labeled 'diff_bpm4a' and ranges from -2000 to 2000. The x-axis for all plots is labeled 'diff_bpm4e' and ranges from -40 to 40. The plots are titled 'diff_bpm4aX', 'diff_bpm4aY', 'diff_bpm4eX', 'diff_bpm4eY', and 'diff_bpm4e'. Each plot shows a dense cloud of points centered around zero difference, indicating high agreement between the two models.
