The figure displays five scatter plots, each representing the distribution of diffraction orders for a specific BPM component. The plots are arranged horizontally and labeled as follows:

- diff_bpm4aX**: The x-axis ranges from -8 to 12 μm , and the y-axis ranges from -800 to 1000 μm .
- diff_bpm4aY**: The x-axis ranges from -15 to 15 μm , and the y-axis ranges from -800 to 1000 μm .
- diff_bpm4eX**: The x-axis ranges from -40 to 60 μm , and the y-axis ranges from -800 to 1000 μm .
- diff_bpm4eY**: The x-axis ranges from -10 to 10 μm , and the y-axis ranges from -800 to 1000 μm .
- diff_bpmE**: The x-axis ranges from -40 to 40 μm , and the y-axis ranges from -800 to 1000 μm .

All plots show a dense, roughly circular distribution of points centered at the origin (0,0), indicating a high concentration of diffraction orders near the center of the distribution.
