The figure consists of five scatter plots arranged horizontally, each showing the distribution of diffraction orders for a different beam parameter. The y-axis for all plots is labeled 'diff_bpm' and ranges from -4000 to 4000. The x-axis for each plot is labeled 'diff_bpmX' or 'diff_bpmY' and ranges from -8 to 6, -10 to 10, -50 to 40, -10 to 10, and -40 to 40 respectively. The distributions are roughly circular and centered at the origin.
