The figure is a scatter plot titled "asym_sam2". The x-axis is labeled "asym" and the y-axis is labeled "sam2". Both axes range from -0.03 to 0.03, with major tick marks every 0.01. A solid diagonal line represents the identity line (y=x). The data points are represented by small black dots and are tightly clustered along this line, indicating a very high degree of agreement between the two variables. The points extend from approximately -0.025 on the x-axis to 0.025 on the y-axis.
