asym_sam5

A scatter plot showing the relationship between two variables, both labeled 'asym_sam5'. The x-axis and y-axis both range from -0.003 to 0.003. The data points are colored according to a scale from 0 to 70, with a color bar on the right side of the plot. The points form a strong positive linear correlation, starting from approximately (-0.0022, -0.0022) and ending at (0.0028, 0.0028). The color of the points increases as they move along the diagonal line.
