The figure is a scatter plot titled "asym_sam7". The x-axis is labeled "asvm" and the y-axis is labeled "sam7". Both axes range from -0.006 to 0.006 with major ticks every 0.002. A diagonal line of data points is plotted, representing the identity line where $y = x$. The points are colored according to a scale from 0 to 300, with a color bar on the right side of the plot. The color scale ranges from dark blue (0) to yellow (300). The data points are concentrated along the diagonal line, with a few outliers at the top right corner.
