asym_atr2

The figure is a scatter plot titled "asym_atr2". The x-axis is labeled "asym" and ranges from -0.04 to 0.04. The y-axis is labeled "atr2" and ranges from -0.04 to 0.04. The data points form a strong positive linear trend. A color bar on the right indicates a scale from 0 (dark blue) to 45 (yellow). The points are colored according to this scale, with lower values (blue) at the bottom-left and higher values (yellow) at the top-right, suggesting a positive correlation between the color-coded variable and the 'asym'/'atr2' variables.
